

# Mini Mobile Badging Unit

*Easily transport your Identification System to any location and operate with little to no preparation.*

## An All-In-One Mini Mobile Badging Unit

The Mini Mobile Badging Unit is a fully integrated, turn-key solution packaged as a compact, self-contained workstation that includes everything you need to photograph, identify and print IDs immediately on-site. The Mini Mobile Badging Unit is designed to quickly be transported and setup with little to no preparation. Just lift the lid, power up and you're ready to go!

This workstation is a light weight, complete solution used to issue credentials on-site and can be integrated with other mobile solutions to track personnel and assets and manage information. The durable, water tight casing can house a command workstation, badging system, cable management and badging supplies while protecting the equipment from atmospheric hazards.

## Positive Identification

1. Provides both a stand alone or networkable solution that can quickly capture a driver's license or state issued ID, then populate a database.
2. A secure ID is produced on a high quality plastic card.
3. Credentials are presented and distributed within minutes.

**Easily transport to any location!**

## A Flexible Solution

The Mobile Badging Units can be configured to meet specific goals and allow customers to choose from a variety of components integrated into their unit including printer, ID software, and capture solutions. Mobile Badging Units can accommodate existing Datacard ID Badging Systems that include a CP40, or CP60 Plus Series printer. Pricing is based on the unique configuration of each unit.

## Mini Badging Unit Features
